

# FILMOPLAST H 54

SELF-ADHESIVE FLEECE FOR PIECES SMALLER THAN THE EMBROIDERY HOOP

54,5 cm x 15 m // 70% CV, 30% Wood pulp //  // Tear-off, self-adhesive

Small embroideries and monograms become child's play with the self-adhesive embroidery backing Filmoplast H 54:

- > Distortion free embroidery
- > Adhesive layer ensures no slippage in the embroidery hoop
- > Filmoplast can easily be removed without leaving residue
- > Especially suitable for pieces which are smaller than the hoop, e.g. handkerchiefs, cuffs, pockets and collars
- > Caps can also be embroidered with a special hoop
- > Makes knitwear, thin jersey, fine silk and even towelling easy to use
- > Allows finished garments to be embroidered, such as blouses, pullovers and polo shirts

# FILMOPLAST H 54

SELF-ADHESIVE FLEECE FOR PIECES SMALLER THAN THE EMBROIDERY HOOP

## METHOD OF USE

HOW DO I USE FILMOPLAST H 54 CORRECTLY?

### APPLICATION – STEP BY STEP:

1. Score the masking paper carefully with a needle (slightly more than you need for your embroidery motif) without damaging the fleece and remove the scored surface.
2. Position the fabric to be embroidered or the fabrics to be sewn together on the self-adhesive fleece and gently smooth it flat.
3. Embroider or sew the pieces of fabric with a fancy stitch.
4. Carefully tear off Filmoplast H 54.

Distortion free embroidery now becomes child's play.
